

# iFoundry Newsletter December 18, 2009

## Happy Holidays from iFoundry

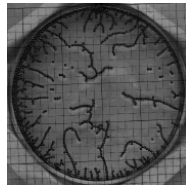

iFoundry wishes you the happiest of holidays as the fall 2009 semester comes to a close. Thanks to all iFoundry students, staff, fellows, corporate advisors and council members for all the work that has been completed in this first semester of iFoundry. **We greatly appreciate your time, dedication, creativity and efforts** that have all contributed to this successful semester.

## Up-next for iFoundry

iFoundry leadership organized the first semester for all iFoundry students, and now we want to hear your ideas about what should be included next semester. If you have any ideas about activities for next semester, **please submit a one page proposal** outlining what you would like to see accomplished. Please send these proposals, and any other ideas that you might have for iFoundry to Karen Hyman, iFoundry associate director, at [kkhyman@illinois.edu](mailto:kkhyman@illinois.edu).

## Behavior of Complex Systems Course

Are you looking for another course to put into next semester's schedule? **Physics 194, Behavior of Complex Systems**, will be available in spring 2010 for all freshman students. The course will provide systematic **training in reasoning and problem solving as well as communicative reasoning**. Throughout the semester, students will learn to predict and control complex systems and will research success stories of complex systems engineering.

## Save the Date: iFoundry Re-launch

Save the date for iFoundry's spring semester re-launch which will be held on **Saturday, January 23<sup>rd</sup>**. More information will be provided over the holiday break but mark your calendars now!
